

Ploskorez Hoe Instructions

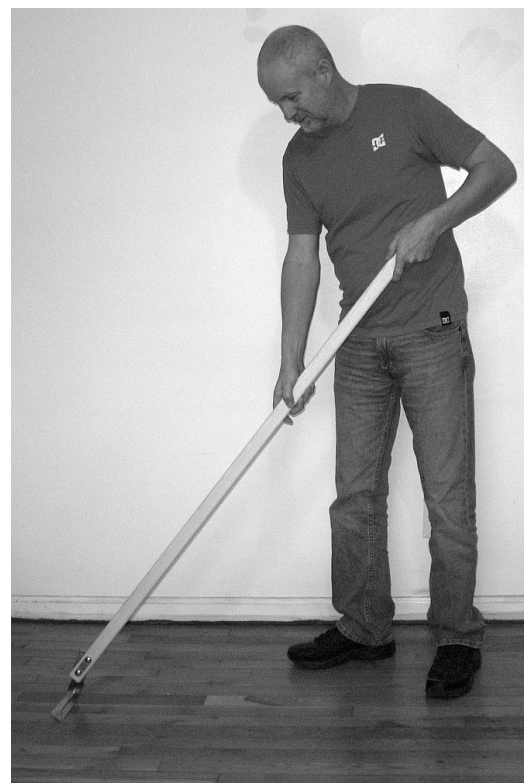

Usage: The Ploskorez can be used in two configurations.

1. With top bolt in the CENTER position, it is used for fine detail weeding in a fairly vertical position. The thumbs of both hands are up, and weeding is done close to the feet. See picture 1.
2. With the top bolt in the LEFT or RIGHT position, it is used like a conventional hoe. The thumbs of both hands are down towards the blade, and weeding is done far to the front. See picture 2.

This tool is only for precision weeding. It is NOT for hacking sod, chopping big weeds, or tilling soil.
